

Crosswalk for SHAPE America National Standards & Grade-Level Outcomes for K-12 Physical Education and CASEL Social and Emotional Learning Core Competencies

Health and physical educators are on the front lines of the [social and emotional learning \(SEL\) movement](#) — and can maximize their impact on students by teaching them the social and emotional skills and behaviors that will help them succeed in all areas of life.

The goal of physical education is to develop physically literate individuals who have the knowledge, skills and confidence to enjoy a lifetime of healthful physical activity. To pursue a lifetime of healthful physical activity, a physically literate individual:

- Has learned the skills necessary to participate in a variety of physical activities;
- Knows the implications and the benefits of involvement in various types of physical activities;
- Participates regularly in physical activity;
- Is physically fit;
- Values physical activity and its contributions to a healthful lifestyle.

The knowledge, skills and confidence learned in a physical education classroom not only allow students to enjoy a lifetime of physical activity, but also allow students to learn and refine social and emotional skills. According to the Collaborative for Academic, Social, and Emotional Learning’s (CASEL), these social and emotional skills allow students to “integrate skills, attitudes, and behaviors to deal effectively and ethically with daily tasks and challenges” (CASEL, 2019).

This document aligns CASEL’s [SEL competencies](#) and related skills to [SHAPE America’s National Standards and Grade-Level Outcomes for K-12 Physical Education](#). This document serves as a resource for those aligning SEL competencies into the existing National Standards and Grade-Level Outcomes for K-12 Physical Education and can be a foundational document to help states and/or districts develop specific guidance that incorporates their own policies, standards or guidance for SEL. This table is not intended to be exhaustive and additional alignments may be made with other National Standards and Grade-level Outcomes for K-12 Physical Education. The crosswalk identifies standards that are applicable to teaching and/or reinforcing one or more of SEL competencies.
